

A woman with long dark hair is sitting in a wooden chair, working on a laptop. She is also holding a tablet in her left hand. The scene is overlaid with a semi-transparent blue filter. The text 'GRAPHIC DESIGN FOR USER EXPERIENCE' is centered over the image in white, bold, sans-serif font.

GRAPHIC DESIGN FOR
USER EXPERIENCE

Introductions

INTRODUCTION

Hi, I'm Lindsay Brine

I've worked at an integrated marketing company, Designsensory for over 15 years. In 2021, I went back to school to pursue an M.F.A. from SCAD in Service Design.

I've worked on hundreds of interaction design projects, taught branding at the University of Tennessee and truly enjoy every facet of the design process.

The Evolution of Interaction Design to Service Design

Interaction Design

'Interaction' → User → Device Interface

Service Design

'Encounters' → User → Service Interface

Elena Pacenti (1998) used interactive design as an analogy to describe service design as a shift from the interpretation of **services as complex organizations** to one of **services as complex interfaces** to the user.

Why are you here?

The image is a screenshot of the Uber website's driver sign-up page. At the top, the Uber logo is on the left, and navigation links for 'Company', 'Safety', 'Help', and 'COVID-19 resources' are in the center. On the right, there are links for 'FAQ', 'Products', 'Log in', and a 'Sign up' button. Below the navigation is a large hero image of a woman wearing a blue surgical mask and blue gloves, sitting in the driver's seat of a car. Overlaid on the left side of this image is a white sign-up card. The card has three icons at the top: a car for 'Driver/deliver', a fork and knife for 'Eat', and a house for 'Ride'. The main heading on the card reads 'Get in the driver's seat and get paid'. Below this, it says 'Drive on the platform with the largest network of active riders.' There is a prominent black button with the text 'Sign up to drive' in white. At the bottom of the card, it says 'Learn more about driving and delivering'. Below the hero image, there is a section for 'Uber for Business' with the subtext 'Transform the way your company moves and leads its people.' and a small image of the Empire State Building.

Class Outline

This class is a study of interaction design fundamentals with a focus on user experience. We will explore prototyping options for proving your concept in this medium without the need to fully develop (i.e. code) a project.

Project 1 - App Redesign

Project 2 - Landing Page Design

Spring Break

Project 3 - Website Design

Project 4 - Process Documentation

What else counts?

Presentations

Reading or Video Assignments

Discussion Engagement (D2L and in class)

Process Realization Professionalism

A class is an experience in sharing individual experiences. Punctual attendance, the meeting of deadlines in a prompt manner, your contribution at critiques and presentations, and a mature respect for your own work as well as that of others is expected.

INTRODUCTION

What is Interaction Design?

T H E H I S T O R Y

4000 BC Feng Shui

Feng Shui is all about arranging your surroundings in the most optimal, harmonious or user-friendly way.

500 BC The Ancient Greeks and Ergonomics

Greek civilizations designed their tools and workplaces based on ergonomic principles.

1900s Frederick Taylor and Scientific Management

Taylor conducted extensive research into the interactions between workers and their tools looking to make them more efficient.

1940s Toyota and the Value of Human Input

Toyota factory workers could pull a cord to stop the assembly line if they had feedback or suggestions to improve the process

1955 Henry Dreyfuss The Art of Designing for People

“When the point of contact between the product and the people becomes a point of friction, then the [designer] has failed.”

1966 Walt Disney

Disney envisioned a place where “the latest technology can be used to improve the lives of people.”

1970s XEROX, Apple and the PC Era

The 1970s kicked off the era of personal computers. Xerox’s PARC research center developed a graphical user interface and the mouse.

1995: Donald Norman Give UX a Name

Donald Norman, a cognitive scientist, joined the team at Apple in the early 90s as their User Experience Architect.

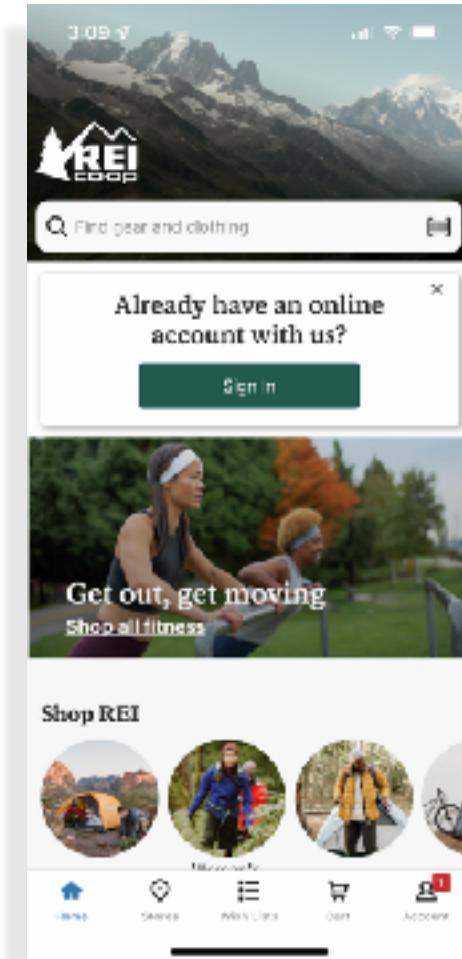

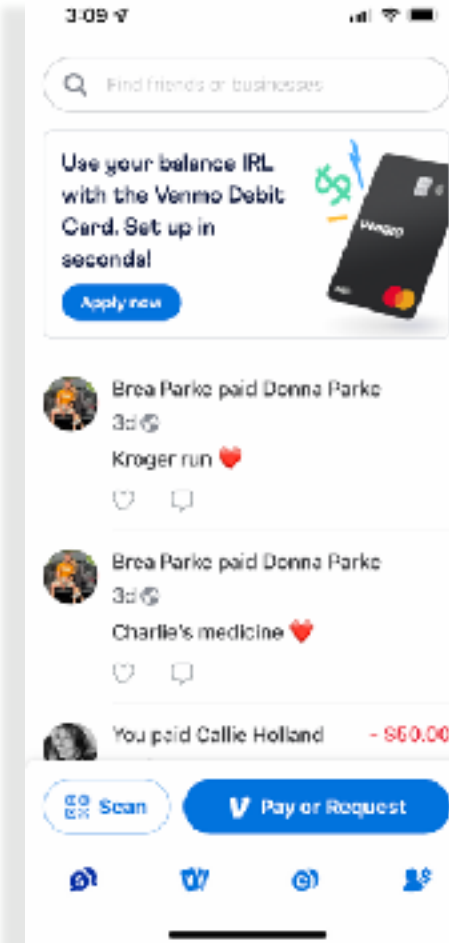

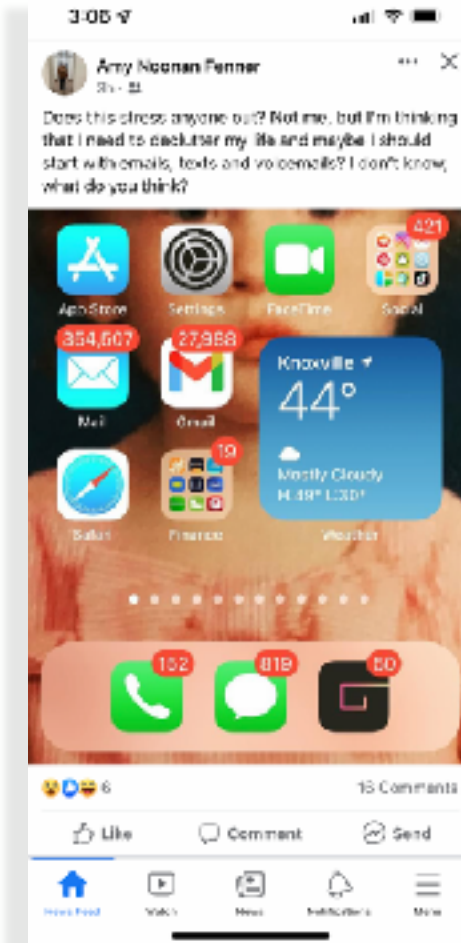

2018+

UX design is constantly evolving, and the fascinating journey continues.

Website Design

Evaluate your website visits based on

Frequency: what are sites you often access?

Enjoyability: what sites do you enjoy visiting?

Use Case: what sites do you go to for a specific task?

UX DESIGN

Mobile First Approach

Designing a product for **mobile** users before expanding to a **design** for tablet and desktop users.

Introduction of the term:

Responsive Design

UX DESIGN

Why a mobile first approach?

GLOBAL YEARLY SMARTPHONE UNIT SALES TO END USERS 2020

1.38bn

GLOBAL ANNUAL SMARTPHONE UNIT SHIPMENTS

1.29 bn

ANNUAL SMARTPHONE SHIPMENTS WITH THE ANDROID OPERATING SYSTEM

1.32bn

Smartphone sales value in North America

84bn USD

Android operating system market share worldwide

85.9%

Apple's smartphone sales market share worldwide

15.2%

Samsung's global smartphone market share

20.6%

Huawei's market share of smartphone shipments Q4 2020

8.4%

Assignment 1

Part 1: Selecting an App to Redesign

Due Next Class: Research and Presentation

Research 3 Apps for Redesign

Consider and include who is the audience, what is the goal or purpose of the app, what special functionality exists. Include all three in your presentation, and select one that you want to redesign. Be ready to present your research to the class and explain why you selected the one you want to redesign.
